EDWARDS RAIL CAR COMPANY IS PLEASED TO ANNOUNCE

HISTORIC 1920'S REPLICA STREETCARS!

Every newly constructed "Replica" Streetcar is designed and built to provide the experience of an old-fashioned streetcar ride, while minimizing the efforts of your car department to keep cars in service and reduce maintenance costs. Modern allowances provide for maximum safety, ADA accessibility and riding comfort while maintaining the historical integrity of the equipment and providing the lowest cost in repair and maintenance.

What sets this equipment apart from others is the use of newly manufactured trucks; wheel sets with railroad type roller bearings; running gear; air brakes and the application of a solid state control system.

This equipment is manufactured new and is outfitted with all new wheel-sets, trucks, running gear, airbrakes and solid state controls.

No recycled or salvaged parts used in the manufacture of new cars!

With the ever growing demand for historic replica streetcar equipment, we are pleased to make available for the industry newly constructed rail equipment based on designs that present the pinnacle of lightweight streetcar technology and classic early 20th century styling.

Standard Production Models Available:

- 56 passenger Double Truck Closed Car
- 52 passenger Double Truck Open Car

ALL CARS MEET APTA TROLLEY & STREETCAR STANDARDS
